

Field: Product Collection

Product Collection

Consists of multiple product / accessory product cards. Product card width across different breakpoints will be automatically determined.

Category: Waterlogic Product Items.

The screenshot shows a settings interface for a 'Product Collection'. At the top, there is a '100%' zoom indicator and a 'Layout Settings' button with a dropdown arrow and a menu icon. Below this, the title 'Product Collection' is followed by the description 'Product collection filterable, default to parent products'. There are two input fields: 'Limit' with a value of '12' and 'Parent ID' which is currently empty.

Product Collection	
Product collection filterable, default to parent products	
Limit	12
Parent ID	

Settings

Limit: How many products would you like to appear within this collection? Default to 12.

Parent ID: The Resource ID of the collection that contains the products or accessories
