

Field: Section Search bar

This field adds a search bar into the content

Category: Waterlogic Fields.

Figure 1

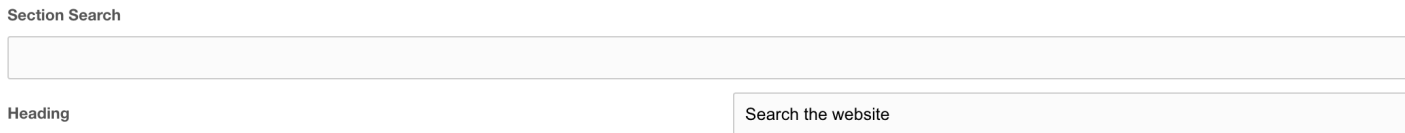

Figure 2

*If fields are left blank they do not render on the front end. It's important that when designing pages using these cards that each card in a layout field has the same fields filled to keep visual user experience.

Fields

Fields	Description	Default
Section search	Enter the ID of the search landing page. By default, it will use the setting set in Search in configuration. To use the current resource as the landing page use modx tag: [[*id]]	
Heading	Add a heading above the search bar	

Revision #4
