

Field: Tab Content

Tab Content Repeater

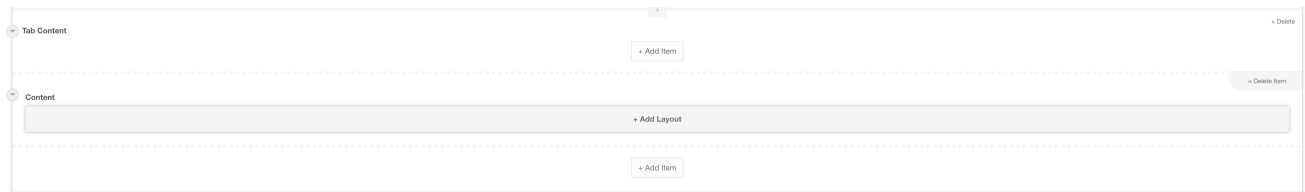

Tab content repeater to be used with "tabs" container only.

Category: Waterlogic Layouts.

Content Blocks Documentation:

<https://docs.modmore.com/en/ContentBlocks/v1.x/Layouts.html>

NOTE: Tabs content repeater is the base start for creating tabbed content within content blocks using the tab title and tab content fields. A tabbed content template has been set up called "Tabbed Content" with all settings defined and sample content to start with.

The screenshot displays a user interface for a 'Tab Content Repeater'. It consists of two main sections, each with a title and a list of items.

- Tab Content:** This section has a title 'Tab Content' on the left and a '+ Delete' button on the right. It contains one item with a '+ Add Item' button below it.
- Content:** This section has a title 'Content' on the left and a '+ Delete Item' button on the right. It contains one item with a '+ Add Layout' button below it.

Both sections are separated by dashed horizontal lines, and each item is represented by a light gray rectangular box.

Repeater Inputs: You can add multiple layouts to the tab content and there should be the same amount of tab content elements as there is tab titles within the tab title field.
