

Field: Accessory Product Card

Accessory Product Card.

Product card displaying information about the product from the product resource.

Category: Waterlogic Fields.

The screenshot shows a configuration window for the 'Accessory Product Card'. At the top left, there is a zoom level of '100%'. At the top right, there are icons for 'Layout Settings', a triangle, and a hamburger menu. The main content area has the title 'Accessory Product Card' and a subtitle 'Select a resource ID to get Product Card information from template variables on the product resource.' Below this, there is a label 'Resource ID' followed by a large, empty text input field. At the bottom center of the configuration area, there is a '+ Add Content' button.

Resource ID: The resource ID of the product that you wish to use within this product card. Can be found easily within the Resource menu (the numeric value next to the resource) or within the url e.g (www.waterlogic.com/manager/?a=resource/update&id=**13** with the ID being 13).
