

Field: Section Search

Section Search

A search input field, that returns results, relevant to that section (parent)

Category: Waterlogic Fields.

The screenshot shows a web editor interface for configuring a 'Section Search' field. The field is described as 'A search input field, that returns results, relevant to that section (parent)'. The configuration area includes two input fields: 'Heading' and 'Landing Page ID'. Below the configuration area, there are two buttons: '+ Add Content' and '+ Add Layout'. The interface also shows a zoom level of 100% and a 'Layout Settings' menu in the top right corner.

Heading: The heading that appears above the search area. Default: empty.

Landing Page ID: The resource id where the results are to appear from the search term provided.
