You can select multiple

Section options

Setting	Description	Default
Section title	Sidebar section title	
Mobile helper text	Text shown on smaller screens to help inform users what to do	
Filter help text	Helper text to give user additional information	

Usage

This field should only be used with Accessory Category and Accessory Sub-Category layout/template, when you insert the field a modal window will open asking you to insert a layout. Choose **Nested Empty Layout**, this layout is specifically designed to be used for nested layouts and doesn't contain any additional mark up. Next select **Sidebar filter options** field, this inserts

a repeater field that allows you to define different product filters (see related below).
