

Field: Video Modal

Video Modal

A video modal. Activated by "Id". This can be on a hyperlink or button

Category: Waterlogic Fields.

Video Modal

Video Type

Video URL

Modal ID

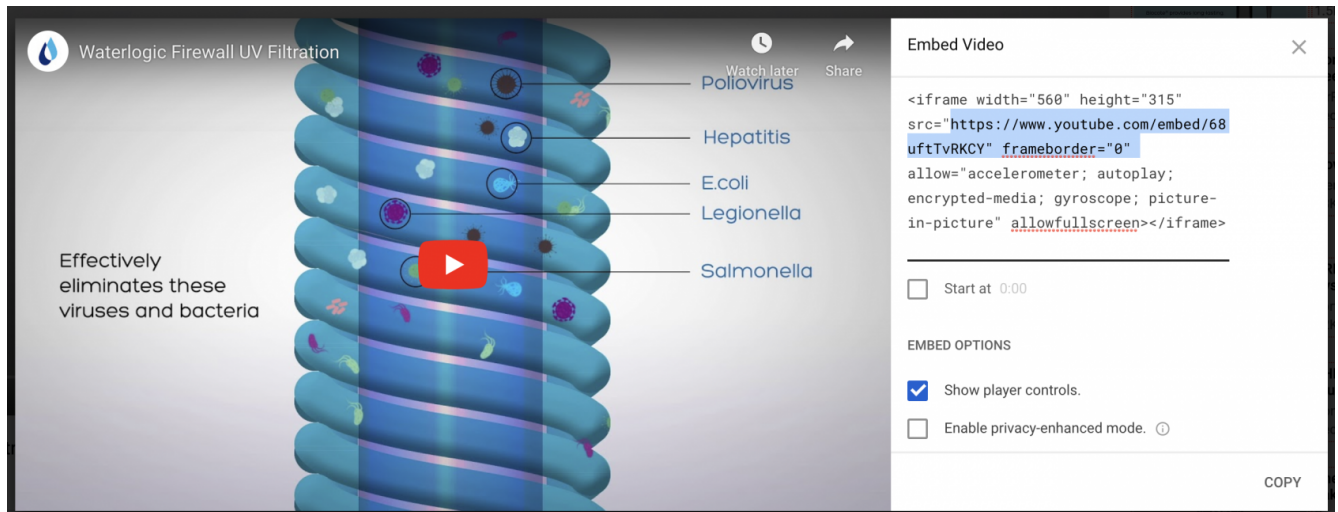

Youtube

Settings

Video Type: The video source (where the url is hosted from, Youtube or Vimeo). Default Youtube

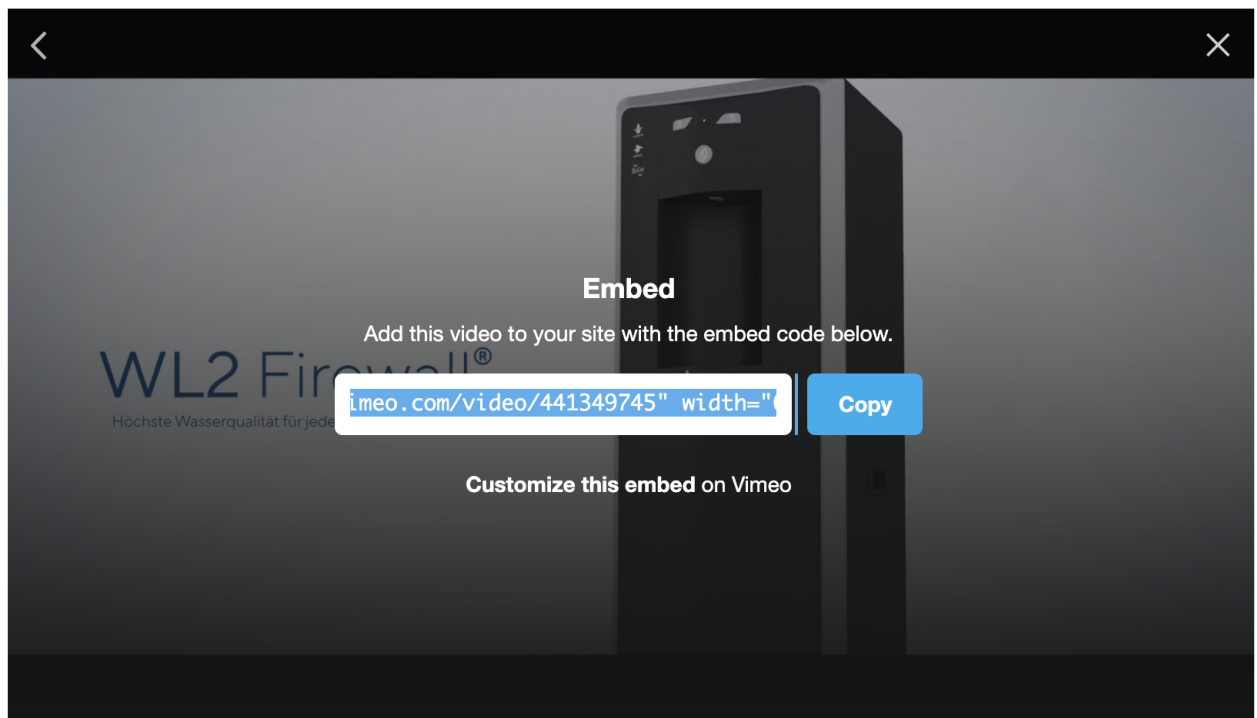

For Youtube Videos:

To show a video on the WL site from Youtube, you need to obtain the video id (i.e for <https://www.youtube.com/embed/68uftTvRKCY> the value to put into the video field would be **68uftTvRKCY**). The only value required is the ID.

For Vimeo Videos:

To show a video on the WL site from Youtube, you need to obtain the video id (i.e for `<iframe title="vimeo-player" src="https://player.vimeo.com/video/441349745" width="640" height="360" frameborder="0" allowfullscreen></iframe>`) the value to put into the video field would be **441349745**). The only value required is the ID.

Video URL: the ID's of the video as advised above, different for both Youtube and Vimeo.

Modal ID: A unique ID to us as a reference for opening this video modal. The modal can be triggered to open from hyperlinks and buttons (see

<http://websitedocs.waterlogic.com/books/content-blocks/page/field-wl-button> for buttons and

<http://websitedocs.waterlogic.com/books/content-blocks/page/field-wl-hyperlink>

for hyperlinks). This **needs to be** be unique to any other ID on the page.
