

Layout: Hero form product right

Three column layout for use as a hero with a form and trusted logos

Category: Waterlogic Heros.

Content Blocks Documentation: <https://docs.modmore.com/en/ContentBlocks/v1.x/Layouts.html>

The screenshot displays a web layout editor for a 'Hero Form Product'. The interface features a dark blue header bar with the title 'Hero Form Product' on the left and 'Layout Settings' with a dropdown arrow and a hamburger menu icon on the right. Below the header, the layout is organized into a grid. The top section contains two rows of image upload controls. The first row is for the 'Hero product image', and the second row is for the 'Second product image'. Each row includes a label, an alt text field, and a control bar with buttons for 'Choose', 'Upload', and 'From URL', followed by the instruction 'or drop an image here'. Below these image sections, the layout is divided into two main columns. The left column is currently empty and has a '+ Add Content' button at its base. The right column contains a large, light gray rectangular area, also with a '+ Add Content' button at its base. The bottom of the layout is a wide, light gray rectangular area with a '+ Add Content' button at its base.

Additional settings are available by hovering over the field and clicking the cog in the top right

How to use

To use this template it is important that the different layout content areas contain the right content. The first (top left) should contain Headings, text, and content related fields. Second (top right) should only have a trusted logos field. And the third (bottom left) should only contain a form. This form will also be added to a mobile modal and a button will automatically show below the content area allowing users to open that form modal.

Options

Option	Description	Default
Hero product image	Product Image to use for Hero	
Hero product image alt	Alt text for hero product image	
Second product image	A second image to use in the hero
