

Page template: Careers Job Listing

A full page template, consisting of multiple content block section templates, layouts and fields, combined with template variable settings and lexicon.

Category: Careers

- This page has been set up to be fully customisable within content blocks for full flexibility. Each Job listing should use the Career_Job_Template as Template variables are used to define settings for each job listing

Template Variables

Job Details: Reference information used elsewhere is the site

Job Location: The location of the Job

Job Department: The department within WL (This should match the Career Department Tag(s). See below).

Job Address: The address of the job listing

Each of the above template variables are used in searches and other relevant areas within the careers area and should all contain content for full consistency and search functionality. The resource must be published to show in search results.

Responsibilities

As part of this journey we require a subject matter expert to help deliver the UTS /Billi element of the Waterlogic Way of Selling Range Sell Model. Reporting directly to the Chief Commercial Officer, this is a Global role, based in the UK and focussed on Europe with an expectation of circa 50% international travel. This is a leadership role. You will be in an open plan, professional environment.

You will mainly be responsible for the following and any other reasonable responsibilities.

Drive the deployment of the Billi range of products throughout all Waterlogic Direct and In-Direct markets.

You will own the Waterlogic Way of Building Billi Sales and deliver tangible business performance through its development and deployment.

You will be the global subject matter expert and your skills will be in high demand across the markets as your reputation grows.

When not designing and delivering world class Business Development for the Billi range of products a large proportion of your day will be spent building a sustainable model that can continue to deliver once you have left the market.

Your operating model will leverage existing in-market permanent and temporary resources based on the business and market needs.

This role will work with/across existing functions via a matrix structure.
