

Template: Related articles slider

Section template that builds a related articles slider with headings and buttons

This Section Template is normally used at the end of a blog article or on the article parent section. When setting a limit on the featured article slider, if the number is greater than 3, a slider will be used to organise the articles.

Category: Waterlogic layouts - Articles

The screenshot displays the configuration interface for the 'Related articles' section template. The top part shows a preview of the rendered section, which includes a heading 'Related articles' and a slider of three article cards. Each card features a photo of a group of people, the title 'Waterlogic presents Oceansaver', and the date '13 Dec 2019'. Below the slider is a button with the text 'View all blog articles'. The settings panel on the right is organized into sections: 'Resources' (Limit number of resources to show: 3), 'Content Settings' (Padding top: None, Padding bottom: None, Margin bottom: 15px, Margin top: None, Additional classes: empty), 'Button' (Button Text: View all blog articles, Button Type: Resource ID, Button Destination: 1), and another 'Content Settings' section (Button Colour: Light Blue, Font Size: Regular, Font Awesome Icon: empty).

This template uses:

1. Layout: 100%
2. Field: Heading
3. Field: Featured article slider
4. Field: Spacer
5. Field: Button

Output:

Latest blog articles
