

# 05\_accessories\_product\_page

## Modx template used for Waterlogic products

This template contains settings and variables specific to Waterlog products. It is important that every product on the website uses the correct product template.

## How/ When to use this template

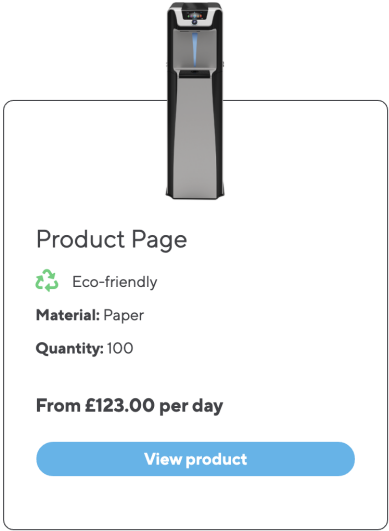

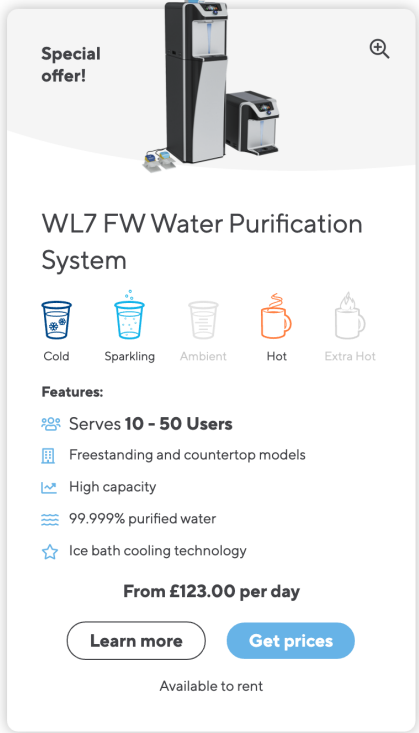

- Accessories sub-category (Collection)
  - Accessories Product page (05\_accessories\_product\_page - this template)

## Template variables

This template has a number of variables that need to be set in order for content to render correctly across the website.

## Product

Template variable name	Usage	Image
------------------------	-------	-------

<p>Product pricing text</p>	<p>Used when this product is displayed using the Product collection Content Blocks field</p>	 <p>FIGURE 1</p>
<p>Product Code</p>	<p>Used to display product code on email communications and certain content block fields that reference this product</p>	
<p>Is this product Eco Friendly?</p>	<p>A checkbox that marks this product as Eco-friendly and displays this information when product is called through certain content block fields</p>	<p>See figure 1</p>
<p>Product availability</p>	<p>Select the availability of this product, this displays the information when the product is called through certain content block fields</p>	 <p>FIGURE 2</p>

## Product - Feature

Template variable name	Usage	Image
Product remark	Displays the product remark when being called through certain content block fields	See figure 2
Icon feature list	A list of features and corresponding icons. These are used on the product category page when referencing this product	See figure 2
Product feature list	A list of features. These are used when referencing this product using the Content Blocks Product Collections field	See figure 1

## Product - Images

Template variable name	Usage	Image
Product feature image	This image will be used across the website to reference this product when it's referenced using a Content block or added to the quote wish list. This is VERY IMPORTANT	See figure 1 & 2
