

Geo location modal

The Geo location modal is used on the global context and helps redirect users to the best matching Waterlogic website.

You can select the type of modal to show by updating the settings in the Website configuration

Configuration	
Emails	Settings used in multiple places on the website.
Global Settings	
Cookies	Location modal type Plain
Scripts	Location modal image image_crops/desktop.e3da6a3c.test_image_05.jpg
Development	

The location modal type can be plain or with an image. If you select the with an image option you can choose the image displayed using the Location modal image setting.
